

NAVIGATOR

QING

The new wave of coffee distribution

THE NAVIGATOR

Master consistent espresso every time with our advanced automatic distribution technology, allowing you to focus on creating unforgettable coffee experiences for your guests.

PREP

ONE TOUCH OPERATION

Say goodbye to the guesswork and inconsistency of manual coffee distribution. With a single touch the Navigator automatically distributes your coffee perfectly, enabling advanced precision, enhancing the quality and flavor of every cup.

STREAMLINING YOUR WORKFLOW

With its innovative in-line functionality the Navigator integrates grinding with precision distribution into one fluid motion, accelerating your workflow while distributing your grounds for optimal extraction.

A PATH TO PERFECTION

The Navigator's unique needle configuration disrupts potential channeling before it gets the chance, guaranteeing a full and even extraction with every shot.

The result is a flat bed of coffee grounds in your portafilter, the foundation for unparalleled espresso shots. This crucial prep stage aligns perfectly with the precision of PUQ PRESS, making sure that when you tamp, it's all about applying the ideal pressure, not correcting the coffee bed.

CAPACITY	500-800 cycles, mode dependent
WARRANTY	2 year
COLOURS	Black, White
DISTRIBUTION PROFILES	STANDARD - SPEEDY - MANUAL
DELAY MODE	Yes
NEEDLE OPTIONS	18-20 gram basket 20-22 gram basket
USB-C CHARGED	Lithium Battery
DIMENSIONS	10.5 × 9.5 × 5.0 cm
WEIGHT	400 grams
